To whom it may concern

PROPOSED OUTFITTING ADDITIONS & ALTERATION (A&A) AND RELOCATING WORKS IN IMMUNOS / NEUROS BUILDING (BIOPOLIS PAHSE 2), LEVELS 5 AND 6, FOR THE INSTITUTE MEDICAL BIOLOGY (IMB) FACILITIES

Jurong Consultants (JCPL) was the appointed consultant for the overall management of the design and construction of new premises for A*STAR's Institute of Medical Biology through a public design tender process. The total project floor area is approximately 6600 sq. m., outfitted at a project cost of about S\$17M. The facilities include research laboratories, some animal facilities, and offices and meeting room spaces.

JCPL's project team was overseen by Nachiappan Sathappan, with Winston Ho, Darren Woo, Yeo Teck Keng, Tan Ming Lei and others. This team contributed significantly to the successful completion and handing over of this fast track project in November 2007. We were especially pleased with the responsiveness of the project leaders to the clients' requirements, the open discussions between consultants and clients, and – not least - the clever and robust overall design of the facilities.

In short, we were very satisfied with JCPL and its team's performance in this project. The team exhibited a level of professionalism, technical competence and management skills appropriate for this type of complex and fast track project.

In conclusion, we acknowledge with thanks the considerable efforts of the JCPL team in achieving our time, cost and quality goals for these facilities and would definitely consider them again for other projects of a similar nature.

Yours sincerely,

Prof. E. Birgitte Lane
Executive Director
Institute of Medical Biology
